

*Will you be doing tomato starts again this year? They were so awesome last year . . . I wanted to know if I could place an order.
All of our plants became huge and healthy and provided us with an abundance of delicious tomatoes. --Chris (happy 2015 customer)*

Will filbert acres be selling tomato starts this year? They were amazing last year. - Kerra

PRE-ORDER TOMATO PLANTS!

But why buy tomato plants from Filbert Acres?

Quality

Stocky, healthy, with blossoms--our plants will be timed well with out northwest season and hardened off to minimize transplant shock. If you are going to spend the time to grow quality fruit, start right! (ORGANIC? Not certified, most organic seeds, all organic soil/inputs)

Variety

When you have some favorite varieties, it can be frustrating to find them at the right time to plant. Maybe the nurseries don't carry all the varieties you want; maybe they don't carry *any* variety you want.

Value

The trip from the farm is the only traveling these plants will suffer, and with a little luck, they'll have some nice blooms and some tiny green fruit on them as you plant them into your garden.

But what is the catch?

To get you this quality, to make these varieties available, and to do it at a great value, we need to plan ahead and start your tomato plants indoors by March 1. So you need to order now and pay at least half up front. We can only accept orders this year through **February 29th, 2016**.

But do I really have to act now?

Yes!! Or you may sadly realize in May that you have to wait until next January to order!

LET ME AT THEM! I WANT TO BUY NOW! – please print and mail (or drop off) this form

Variety	Size, color	No. of plants
Early Girl – classic early performer for Pac NW, indeterminate	Med, red	
Sungold – a newer classic with unique tang, a favorite of all who taste it, indeterminate	Cherry, orange	

Cougar Red – new (-ish) from WSU, grown and tested for cool summer/short season. Meaty, balanced flavor, vigorous, semi-determinate, open-pollinated!	Medium, red	
Black Prince – from Russia, this indeterminate plant performs well in cooler regions, mahogany skin, green shoulders and florid, green/red striped flesh	Medium, dark	
Sweet Millions – heavy producer of sweet cherry tomatoes. Very disease resistant, early, great flavor, indeterminate	Cherry, red	
Stupice – cold-tolerant, sweet, red, slightly oval, consistently gets high marks for taste throughout the summer. From Czechoslovakia. Indeterminate	Medium, red	
Green Zebra – zesty flavor, green skin, mottled streaks. Consistent producer and one of our favorites. Indeterminate	Medium, green	
Monica – large performs well in Pac NW, our favorite Roma Determinate.	Roma , red	
Granadero —early, heavy yields of large 4-5oz fruits good disease resist	Roma , red	
Sweet Hearts – sweet grape with crack resistance, drop resistance. Indeterm.	Grape, red	
Arbason – reliably early large beefsteak. Outdoor/greenhouse Indeterminate	Large Red	
Cherokee Purple – late or best for greenhouse, vigorous plants, purpl-ish fruit with green shoulders, an heirloom favorite. Indeterminate	Large, purple	
Fantastic – late or best for greenhouse; slicers, very solid, crack resistance, meaty, rich in beefsteak flavor, Indeterminate	Large Red	
Brandywine – late or best for greenhouse; flavor to which other tomatoes compared. Not heavy-yielding, up to 7 inches across. Indeterminate	Large red/pink	
Pork Chop – new from Wild Boar (breeding heirlooms for improved quality) Heavy yields, sweet beefsteak, striking yellow with orange shoulders. Osborne grower “blown away” by Pork Chop. Indeterminate	Large yellow photo right	
Pink Berkeley Tie-Dye – a new favorite from Wild Boar, nicely balanced between acid and sweet, disease resistance good; pink/purple with green metallic stripes	Large, red/green photo left	
Is there a variety not listed here and you want 10 or more? We can do that— please add \$5 fee for ordering off the menu _____
